

WEST RIVER TEXTILE AIR CONDITION

Design → **Production**

Introduction

West River established in 1969. As a professional manufactory producing textile ventilation equipment, we have always kept the faith "The strictest qualificative controls" "The best qualities" "The most prefect technology" "The most satisfying service" to push and request ourselves constantly to content our customers completely.

For the economical growing and elevating quality of environment. **West River** particularly imports the finest technology and the products from Europe, America, and Japan. expects to gratify our customer's necessity.

With 50-year experience, we have particularly developed a series of ventilation equipment based on the features of textile factories to reach your expectations. Our technologists can design the system with very low power consumption and high efficiency.

Our managing principle is to offer our customers satisfying products with uninterrupted development, innovative technology, and the most professional and complete fixing ability, moreover, the honest after-sales service.

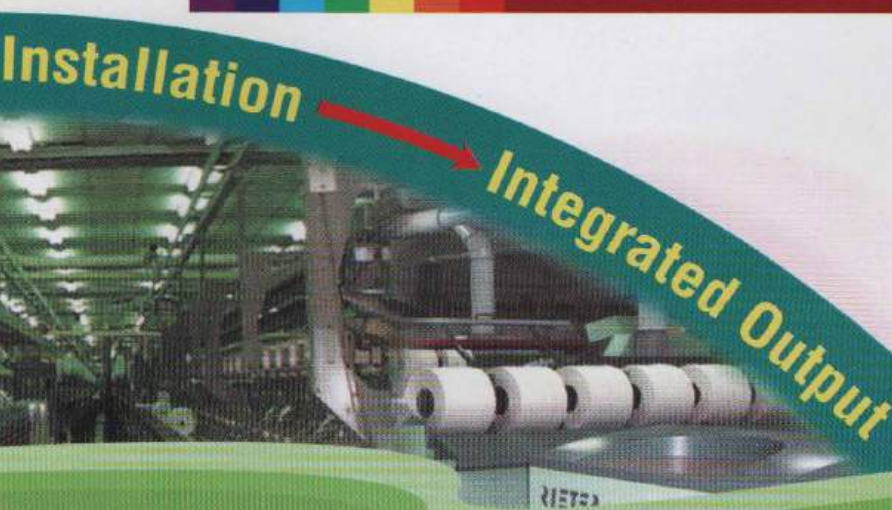

Chose us, you chose the insurances.

Business Items:

Air Condition System / Humidification System / Energy Saving System / Modification
for

- Textile Mill
- Spinning Mill
- Weaving Mill
- Knitting Mill
